

RICH STRIKE MADE ON LITTLE DAISY

Great Body of Copper Glance
And Native Copper Uncovered
Adjoining United Verde

(From Saturday's Daily)

What is believed to be the greatest discovery of copper ever made in the history of Arizona, occurred last Wednesday at noon, on the Little Daisy ground of the United Verde Extension Mining company, when a body of nine feet of ore, carrying red oxide of copper and copper glance was cut into in a crosscut at a depth of 800 feet.

Up to the time of this measurement taking place, the extent of the strike could not be determined, as the miners were still at work in drilling into it.

Last night another round of shots was to be fired, when further details will be learned.

A remarkable condition in mining was proven in this discovery, the ore body being practically solid mineral and not a pound of waste was taken out.

The town of Jerome is excited over the discovery, and the stock of the company is anxiously sought for, with no sellers. On the contrary, the par value has suddenly reached double in value, and telegrams are pouring in from the Chamber of Commerce at Bisbee, the east and other points, asking for stock. This lively desire to get these interests is one of the noteworthy evidences of the bona fide rating of the property and corroborates the big strike that has been given publicity.

After the news reached Jerome, Mr. Fisher was congratulated by all of the business men, while the miners by the score came forward to extend their good wishes.

Mr. Fisher arrived last night from his camp, bringing several pounds of the red oxide and copper glance ore. He will remain in the city for a few days, to transact urgent business.

He not only confirms the report of the vast extent of the ore body cut into, but gives the additional information that the richness of the ore, together with its distinctive mineralogical character, is unlike that of its neighbor, the United Verde, and so far as demonstrated in development, through the copper glance character in evidence, is probably in a class by itself. This feature of the yield is something of a revelation to the mining people of that section, which serves to enhance the deep interest taken in the strike.

At this particular time a brief review of the development that has terminated so successfully on this now valuable property, is given, and will prove interesting to the mining people of this county and territory.

After practically three years of diligent and earnest work, the main shaft reached a depth of 800 feet on the Little Daisy ground. From that point further exploitation was directed through a drift running toward the city of Jerome in an easterly direction, and a point about 550 feet was reached, when further progress was stopped on that level.

Branching off with a crosscut at that station a northeasterly course was taken for a distance of 220 feet, where the big ore body was cut. Preceding this big discovery, at a point

Various Formations.

In the progress of development, various formations were cut into, carrying lime, spar, schist and black slate, with occasionally some sulphides appearing. Immediately preceding the coming in of the big ore body twenty feet of blue tale gouge appeared, and was passed through. At this point, the first practical determination was accomplished of what has stirred the mining community of this county to a high state of intense interest. The miners, in drilling into the face of the ore readily noticed the change coming in, and taking the pulverized soil began panning it.

The results were astounding, and the bottom of the pan was shown to carry native copper in such quantities as to cause excitement among those who were conversant with big values. The panning also showed what at first was pronounced by all as an iron metal through its resemblance to that family of mineral. But later this was proven to be nothing more nor less than copper glance. This demonstration of that mineral being present, intensified the situation all the more, and keen interest was shown from that time on, when a round of shots exposed a body of four feet of a red oxide of copper, seamed with native copper and copper glance product. Not an ounce of waste was shown from these shots. Further drilling was carried on and one more round of shots has been fired, showing nine feet of ore of the same character, no sign of getting through it. One more round of shots was to have been fired last night, and the purpose is to continue exploitation until the extent of the deposit has been determined.

Property's History.

For three years, under the personal direction of J. J. Fisher, the general manager of the company, the work has progressed earnestly and practically. Development has been at times

PIONEER HOME ABSOLUTELY ASSURED

(From Saturday's Daily)

Through the arrival in Prescott, yesterday, of Hon. R. A. Craig, the citizen member of the Board of Control of Arizona, all apprehension or any doubt over the building of the Pioneer Home in this city, was dissipated.

Mr. Craig is in the city for the specific purpose of expediting this movement, and stated yesterday that immediately upon his return to the capital the first step will be taken to award the bids on the competitive plans called for.

He will endorse the original site. In a few days the good news may be expected from his official headquarters that the project will be under headway. Mr. Craig stated yesterday that a local architect will get the plans, and he singled out Architects Elliott and Brennan, both of Prescott.

During the brief visit of this official he was taken to the Murphy addition by Major Doran, and was pleased with the site and the beautiful range it afforded in picturesque surroundings, owing to its elevated position. With such an earnest and energetic official behind the project, the beginning of the work will take place soon and the place thrown open to the deserving pioneer who is entitled to all that it implies.

suspended, owing to embarrassing financial conditions, but these, fortunately, have not seriously interfered with the plan outlined and supported by Mr. Fisher and the many in this city and elsewhere who were conversant with the possibilities of the enterprise. A few months ago it was evident that mineralogical conditions were indicative of the successful outcome of the development, and from the renewed interest felt in the enterprise, backed by ample finances, the success of the enterprise is all the more significant of the merit of the enterprise from beginning to end.

The United Verde Extension people own five claims. The Little Daisy, through which this gigantic discovery was made, was originally located by Mr. Fisher. It was on this ground where the first pick was struck into the earth, and as a matter of justice to the man, Mr. Fisher must be given the credit for the strike, being aided in his plan of opening up the property by the advice of Major Pickrell and John S. Reilly.

Properties Adjoin United Verde.

The company's properties are located on the east side lines of the United Verde, and from the main shaft of the latter to the main shaft on the Little Daisy, through which the strike was made, the distance is about 1,600 feet. The United Verde is situated at a higher elevation, owing to the contour of the country, while the Little Daisy shaft is in a deep gulch below, that passes through the city of Jerome. The company owns a group of five mines, all under United States patent.

Mr. Fisher returned a few weeks ago from the east on matters of vital interest to his company, and during his visit successfully arranged for the financing of the enterprise. The strike taking place so soon after the termination of that trip, only the more conclusively proves the deep interest that has attended further development and substantiates the wisdom of the investment.

A few days ago, or practically at the time the strike was known, a block of this stock was acquired by telegraph from a resident of the city, at a price below par value, the purchaser residing in an eastern city. The Prescott seller was advised to hold his interest, from Jerome, and was about to cancel the contract, when the banking house paying the money, concluded the transaction for its client, and refused a few minutes thereafter to return the stock, although the one disposing of it earnestly asked for its return for the price he received.

Hundreds of Telegrams.

Inquiries are coming to this city and other places for sellers, but in this the market is closed, and none are willing to let go, even at an advance of double the price over the par value of their interests.

Hundreds of telegrams are coming into the city and as many are going out, the news of the strike reaching all mining financial centers of the country.

Journal-Miner—High class job work

BOYS IN BLUE TO ENJOY PAY DAY

(From Saturday's Daily)

The troops at Whipple will be paid this afternoon at 2 o'clock, in the following order:

Non-commissioned staff, detachment hospital corps, Company C, 18th Infantry; Company D, 18th Infantry; Company B, 18th Infantry; Company A, 18th Infantry. First Lieutenant Walter E. Gunster, 18th Infantry, adjutant, has been designated to make the payment.

The order issued recently to have parade and review Saturday in honor of the delegation of business men from Los Angeles, has been revoked. All officers of the garrison have been formally invited to attend a reception to be given at the Yavapai Club, this evening, at 9 o'clock, in honor of the delegation of business men from Los Angeles.

First Sergeant Walter F. Rhinow, Company C, 18th Infantry, stationed at Whipple Barracks, was ordered to proceed on the 18th inst., or as soon thereafter as practicable, to the Recruiting Depot, Fort Logan, Colo., and report to the commanding officer thereof.

Sergeant Rhinow has been a consumptive for over a year. While in the Philippine Islands, he developed the disease to such an extent that he was ordered to return to the United States, and was sent to Fort Bayard, N. M., for treatment. Soon after the return of the regiment from foreign service, Sergeant Rhinow was ordered to rejoin his company, having apparently recovered from the disease. After being here about a month symptoms developed again, resulting in sending him to the Post hospital for observation and treatment, and this later order requiring him to appear before a Medical examining board to be examined for discharge for disability. Sergeant Rhinow left on the 2:50 train yesterday afternoon.

Two strong aggregations of ball players from Whipple are to cross bats at the Prescott baseball park, next Sunday afternoon, at 2:30.

The teams are picked from the best of the ball players, those Companies A and C being matched against B and A.

Every afternoon for the last week these men have been going through a strenuous practice, with the result that the two teams will be able to put up a rather stiff game.

The admission will be as usual, 50 cents. The entire proceeds of the game are for the benefit of the Prescott Baseball association, a suitable prize to be given the winning team. Jesse Wilson will be the official umpire, so be on time when he yells "Play ball."

DEATH CALLS

PROMINENT RESIDENT

(From Friday's Daily)

William Gammill, one of the best known residents of this city, passed away yesterday morning from the effects of a hemorrhage of the brain. He was seized with this affliction last Friday morning, while going to his place of business, and a short time thereafter lapsed into a state of unconsciousness, from which he never rallied. It will be remembered that Mr. Gammill was the victim of an auto collision with the buggy he was driving, last June, sustaining at that time serious injuries to his body and head, and it is believed that through this accident death is due. He has complained ever since the accident of intense pains, and has constantly been under the care of a physician.

Mr. Gammill was a popular man with a large number of people in the city. His generosity was shown in a material manner with many, and his loss will be generally regretted by scores of acquaintances. He arrived in this city with his wife and daughter in 1899, coming from Nebraska, where he followed farming as a vocation. After reaching this city he engaged in business, and up to the time of his death followed his line of pursuit.

Besides his wife and daughter, who were with him to the end, he leaves a mother, residing in Oklahoma, two brothers and two sisters in Oklahoma, and other relatives. His brother, Andrew, is expected to arrive today, and pending the wish of relatives as to the disposition of his remains, the date of the burial will be announced later. It is probable that the body will be taken to Nebraska for interment. The deceased was born in Sullivan, Ill., fifty years ago.

ANGELENOS WILL BE QUEEN CITY GUESTS

Royal Entertainment Will be Afforded
Californians During Their Visit In
Prescott Tonight.

(From Saturday's Daily)

After all, the Los Angeles business men are coming. Telegrams were received yesterday stating positively that the itinerary had been arranged so as to permit of their enjoying the hospitality of the citizens of Prescott for several hours. They will arrive tonight, about 7 o'clock, and will be the guests of the city until 10 o'clock. The visitors, upon their arrival, will be taken through the business section of the city. Many of them are wholesalers and they have customers here in Prescott, who will only be too pleased to greet them. Then they will go to the Yavapai Club, where a buffet luncheon will be given in the dining room. Messrs. Doyle, Cheverton and Kastner are looking after this feature, and it is certain that there will be no lack of entertainment and good cheer. While the Yavapai Club has tendered the use of the building, the reception, itself, is in the hands of a Citizens Committee, and all citizens are accordingly welcome.

Prescott is noted for its hospitality, and while the time of their visit will not permit showing the visitors the big mines, industrial institutions and scenic attractions of the county, still the welcome, while necessarily simple, in character, need not be the less fervent or whole-hearted. The Citizens' Committee having requested that the members of the Monday Club assist them in the entertainment of the ladies who will accompany the members of the Los Angeles Chamber of Commerce, during their visit to this city, a called meeting of the club was held yesterday.

It was decided that the plan of entertainment be placed in the hands of the Social Committee of the Club, which has planned the following program:

The Reception Committee will meet the guests at the train, and will drive them to places of interest about the city, returning at 8:30 o'clock to the parlors of Masonic Temple, which have been kindly tendered to them for the reception, which will be held from 8:30 until 10 o'clock p. m.

Light refreshments will be served, and it is the intention of the Club to have their reception convey a very hearty, though informal welcome to the guests, and the Club takes this opportunity to invite the ladies of Prescott and Fort Whipple to join with them, at the reception.

The Social Committee in charge of arrangements are Mrs. N. Levy, Mrs. Fred Kessler and Miss Theresa Fredericks, assisted by Mrs. Morris Goldwater and Mrs. T. N. Otis.

Nearly every person in Prescott knows one or more members of the excursion party, and for this reason the list of the visitors is published this morning in order that those who have friends may take the opportunity to meet them. For instance, Dr. Walter Lindley, who is one of the most noted surgeons in the West, is one of the party. He is an old friend of Dr. J. W. Flinn, and the latter was recommended by Dr. Lindley to locate in Prescott.

Frank L. Wright, Chas. T. Joslin, F. P. Cruice and A. W. Edwards left last night for Phoenix, to greet the members of the party, who are as follows:

Fred L. Alles, Alles Printing Co.; F. H. Brodin, A. Brodin & Co.; L. N. Brunsig, Brunsig Drug Co.; H. C. Burr, Parrot & Co.; J. J. Byrne, A. P. T. M., Santa Fe Ry. Co.; F. A. Brown, Excelsior Cereal Co.; Mrs. P. A. Brown; A. Bernheim, Anderson & Chanslor; Edwin Bird, Douglas Clay Product Co.; Thos. Bamford, Thayer Decorating Co.; J. W. Bainbrough, Ocean Park; C. M. Burr, C. W. Brashers, contractor; J. L. Bernard, L. A. Examiner; R. M. Burnham, Hubbs Mfg. Co.; E. H. Bagby, Stocks and Bonds; D. E. Bowman, Eastern capitalist; E. P. Bobysell, J. M. Carpenter, Pacific Sash and Door Co.; A. L. Carpenter, retired; M. G. Cooper, Cooper, Coate & Casey; Fred Czemisk, Acme Brass Foundry Co.; S. Crandall, Cal. Hrwr. Co.; W. H. Clune, Clune theater; W. T. Craig, attorney; F. B. Crosier, So. Cal. Lumber Co.; G. Del Ame, K. Cohn & Co.; R. C. Devereaux, City Directory Co.; Harold Dewey, Pomona, Cal.; A. H.

SHEEP SITUATION FAIR.

Hugh Campbell, the big sheep grower, passed through the city yesterday afternoon from the range in the southern part of the county, where his flocks are wintering. He says the drive will be started north in a short time. While the condition of the animals is not as bad as was believed would prevail earlier in the year, the various bands have fared moderately well, and taking everything into consideration, the many owners feel elated that the losses have not been greater than was experienced earlier in the season.

Anyway, spinsters and old bachelors always agree as to how children should be brought up.

Few men appreciate freedom until they view it from the other side of the bars.

Woman's Beauty

Some women retain their beauty to an advanced age. But women, who regularly endure pain, age rapidly, for suffering leaves its lasting marks on them.

Nearly all women suffer more or less with some form of female trouble. It should not be neglected. Avoid the pain—treat yourself at home by taking Cardui, as thousands of other women have done. Begin at once and give Cardui a fair trial.

TAKE CARDUI

It Will Help You

Mrs. Katie Burlison, Goreville, Ill., tried Cardui and writes: "I suffered with female troubles, and was so sick I could not stand on my feet. Finally I began to take Cardui, and soon began to mend. Now I am able to do all my housework and am in much better health than I was before." Try it.
